Forward-Looking Information

This presentation contains forward-looking statements. All statements other than statements of historical facts contained in this presentation may be forward-looking statements. The words “may,” “will,” “should,” “expects,” “plans,” “anticipates,” “could,” “intends,” “targets,” “projects,” “contemplates,” “believes,” “estimates,” “predicts,” “potential” or “continue” and other expressions that are predictions of or indicate future events and trends and that do not relate to historical matters identify forward-looking statements. Forward-looking statements involve known and unknown risks, uncertainties and other important factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Important factors that could cause actual results to differ materially from expectations are disclosed under the “Risk Factors” and “Cautionary Note Regarding Forward-Looking Statements” sections of our annual report on Form 10-K for the year ended March 31, 2019, as amended, and subsequent filings with the Securities and Exchange Commission (the “SEC”). All written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the cautionary statements. You should evaluate all forward-looking statements made in this presentation in the context of these risks and uncertainties. Because forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified, you should not rely on these forward-looking statements as predictions of future events. The events and circumstances reflected in our forward-looking statements may not be achieved or occur, and actual results could differ materially from those projected in the forward-looking statements. The forward-looking statements in this presentation are made only as of the date hereof. Except as required by law, we assume no obligation to update these forward-looking statements, or to update the reasons actual results could differ materially from those anticipated in the forward-looking statements, even if new information becomes available in the future.

Non-GAAP Financial Measures

Adjusted net income and adjusted operating expenses are presented and discussed in this investor presentation and are non-GAAP measures that management believes, when presented together with comparable GAAP measures, are useful to investors in understanding the Company’s operating results. Adjusted net income and adjusted operating expenses remove the significant accounting impact of one-time charges associated with the Company’s one-time/non-recurring matters, as set forth at the end of this presentation.

Adjusted net income as calculated by the Company is not necessarily comparable to similarly titled measures reported by other companies. Additionally, adjusted net income is not a measurement of financial performance or liquidity under GAAP and should not be considered as an alternative to the Company’s financial information determined under GAAP. For a description of the Company’s use of adjusted net income and a reconciliation with net income, as well as a reconciliation of the specific line items in adjusted operating expenses, see the end of this investor presentation. Please refer to our financial statements, prepared in accordance with GAAP, for purposes of evaluating our financial condition, results of operations, and cash flows.

Overview of Business Segments

Corporate Finance Business

- Corporate Finance is a leader in the U.S. mid-cap space, which represented approximately 98% of M&A volume in CY 2018
- Our market share in the U.S. mid-cap space is less than 2%, based on the number of closed M&A transactions we completed in CY 2018
- The mid-cap space is meaningfully less volatile than the large-cap space, which when combined with HLI’s ongoing opportunities to increase its relatively low market share, generally results in less revenue “downside” in weaker M&A markets

Corporate Finance Business

- Closed Global Mid-Cap¹ M&A volume has a 5-year (2013-2018) CAGR of 3.5%, however there has been a 2.8% decline in the last 2-year (2016-2018) period
- Global M&A revenues in our corporate finance business have a 5-year (2013-2018) CAGR of 17.5% and a 2-year (2016-2018) CAGR of 17.3%, reflecting continued market share gains and higher average transaction fees during the measurement periods
- We continue to increase market share as a result of companies choosing to use an advisor, as well as taking market share from firms that don't have the same depth and breadth as the HLI platform

Financial Restructuring Business

- Deepest bench in the industry, with 44 MDs and 226 total finance professionals as of March 31, 2019
- A true global player, having closed transactions in more than 60 countries around the world since 2000
- Flexibility to work on large global restructurings as well as mid-cap restructurings
- With strong performance in a historically low interest rate and default rate environment and consolidating market share, we are poised to take advantage when interest rates and/or default rates begin to rise
